

Storm & Flood Preparedness

2009

INFORMATION TO HELP YOU MINIMIZE RISK TO LIFE AND PROPERTY

Two reminders of the dangers of storms, flooding

Our city marks two significant milestones this year, anniversaries of two hurricanes that presented difficult times that brought out the best in our residents and our country, and both served as valuable lessons in how we must be prepared for storms and flooding.

August 17 is the 40th anniversary of Hurricane Camille striking Biloxi and the Mississippi Gulf Coast, and Aug. 29, of course, is the fourth anniversary of Hurricane Katrina devastating our community.

Both of these dubious storms have the distinction of being the most destructive to strike the continental

United States when they made landfall, and, of course, both devastated Biloxi and the surrounding area.

The City of Biloxi is joining with our community partners – the chambers of commerce, and Cable One – to sponsor events that will help remind us of the devastation that we endured and how we must be vigilant in our efforts to prepare for storms and flooding.

This annual newsletter, in fact, is part of the city's continuing outreach effort to educate new residents and remind longtime residents about the dangers of storm and flooding, and to help you minimize the threat to you, your family and your property. Although hurricane season runs from June 1 to Nov. 30 each year, torrential downpours and flooding know no season.

As a resident of Biloxi, you have a responsibility to do your part. Read the stories in this newsletter. Heed the advice. Prepare a personal storm plan for you and your family, and consider contingencies to deal with an array of scenarios you may face.

As your mayor, I'm proud of the determination that you and your fellow residents of Biloxi have demonstrated in overcoming the myriad challenges we have all faced. We've come too far and made too much progress – and we have too promising of future – to lower our guard at this point.

Finally, I've heard more than one person wonder aloud what we'd do if Biloxi and the Gulf Coast were threatened or struck by another storm. We'll do what we've always done. We'll prepare, we'll persevere and we'll prevail.

God bless you and God bless Biloxi.

A.J. Holloway
Mayor
July 29, 2009

Biloxi City Council:

George Lawrence • William "Bill" Stallworth
Lucy Denton • Clark Griffith • Tom Wall
Edward "Ed" Gemmill • David Fayard

Now is not the time to let your guard down

The 2009 hurricane season is off to the slowest start in five years, but experts say the real activity usually doesn't begin until August.

And even though the first Atlantic named storm usually forms by July 10, the early season lull doesn't necessarily mean a weak overall season.

A maturing El Nino in the Pacific Ocean, which tends to depress storm activity by 20 to 40 percent, makes the outlook for the rest of the season look promising. But forecasters say it's no time to relax and El Nino years can still produce destructive storms.

"It only takes one," Mayor A.J. Holloway said when hearing the news about the slow start of the 2009 season. "We should not fall into a false sense of security or complacency."

Ten tropical storms or hurricanes develop during an average Atlantic season, but since 1995 the Atlantic has seen an upswing in activity. Most scientists attribute that to a long-term natural pattern.

Given this season's slow start and the onset of El Nino, most seasonal forecasters now say about 10 named storms will form, one of the lowest totals of the past 15 years.

The 2004 season didn't get its first storm until Hurricane Alex began developing on July 31. After Alex, the season finished with 15 storms and six major hurricanes, including Hurricane Ivan. One of the three most-intense storms at a U.S. landfall, Hurricane Andrew, developed during an El Nino in 1992.

Holloway, who has met with city department heads to review the city's storm-preparation plans, is advising residents to begin updating their personal storm plans.

"Now is the time to consider things like if you have to evacuate, where are you going to go? Do you have relatives upstate or in a neighboring state? Have you plotted your evacuation route and travel time? Have you made arrangements for the family pet? Do you have important papers in a secure location? Have you thought about the things that you'll need to secure in your yard? And, finally, have you checked your storm kit to make sure that you have the key items like a battery-operated radio with fresh batteries, emergency food and water, a non-electric can opener, and a first-aid kit?"

"These sound like a lot of questions to consider," Holloway added, "but if you go by the checklist, you'll get it all done and have the satisfaction of knowing you're prepared."

"The fact is," Holloway said, "you must prepare for even minimal storms and flooding."

For its part, the City of Biloxi, in cooperation with other local emergency management authorities, again plans to issue evacuation recommendations and orders when storms threaten the area.

"Essentially," Holloway said, "the plan again this season is to ramp up the notices to the public. If Biloxi is in the probability cone 72 hours before landfall, expect to see a recommended evacuation announcement.

If we're still in the probability cone 48 hours out, expect to see a mandatory evacuation order for low-lying areas, which triggers the closure of casinos; and at 36 hours out, you can plan on seeing a mandatory evacuation."

Added the mayor: "We're aware that even a moderate storm would cause extensive damage given that our waterfront areas are still barren, and we're dozens of residents are still in trailers, so it's important that everyone take the necessary steps now to be well-prepared.

WHAT TO DO AND WHEN TO DO IT

Residents of Biloxi can plan on seeing a constant flow of information regarding weather bulletins and advice this hurricane season, as well as early warnings about storms. Here are key timelines to remember:

72 hours before landfall

If Biloxi is in the probability cone, expect to see a recommended evacuation announcement.

48 hours before landfall

If Biloxi is in the probability cone, expect to see a mandatory evacuation order for Zone A and low-lying areas. At this point, casino resorts are expected to close.

36 hours before landfall

If Biloxi is in the probability cone, expect to see a mandatory evacuation order for Zone B.

What you can do now

Don't wait until a tropical depression or hurricane is in the Gulf to begin preparing. There are steps you can take now. See the list on Page 6.

More info

- To see evacuation zones and evacuation routes, see map on Page 2.
- Information also will be available via city e-news, and through a recorded message on the City of Biloxi Storm Info Line, which is at 435-6300.

Hurricane Katrina bearing down on the Gulf Coast

The stories of a lifetime

Cable One and the City of Biloxi will air "A Lady Called Camille" and "Katrina & Biloxi" this year to mark the 40th anniversary of Camille and the fourth anniversary of Katrina. For details on the programs, see Page 4.

Do you have flood insurance?

Some homeowners may have been required to buy flood insurance when they obtained a mortgage or home-improvement loan.

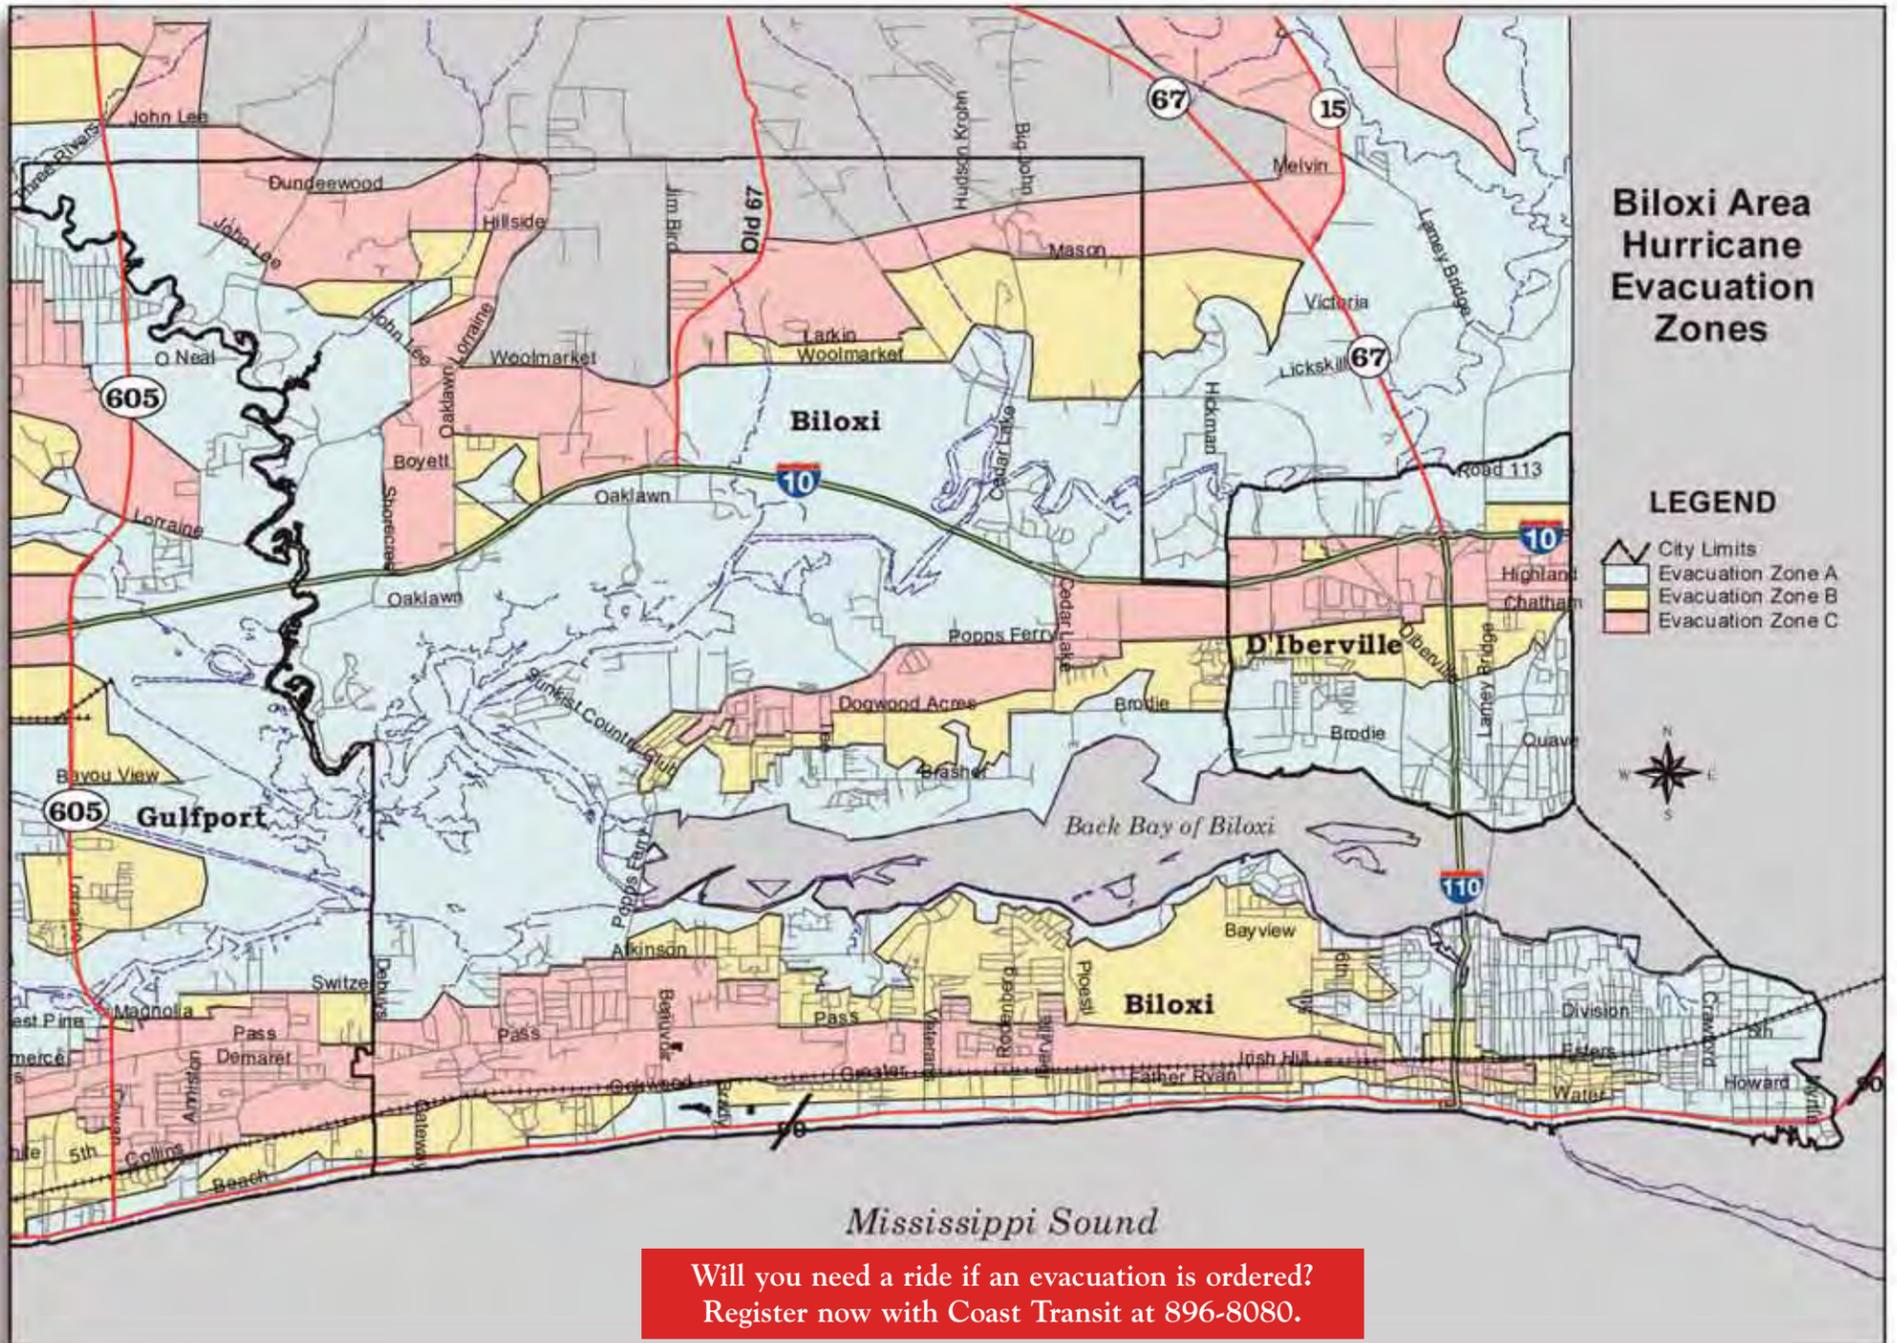

However, in many cases, these policies cover only the structure and not your possessions. You can protect your home and contents through the National Flood Insurance Program, in which the City of Biloxi participates.

Local insurance agents can sell a flood-insurance policy separate from your homeowners or windstorm policy. Anyone can get – and everyone should have – flood insurance.

These policies are regulated by the federal government. Any agent can sell a policy and all agents must charge the same rates, which are set nationally. Your rates will not change even if you file a claim.

There is a 30-day waiting period before the policy becomes effective.

Contact your insurance agent to determine what type of coverage you have.

Think ahead on evacuations, storm shelters

One of the toughest decisions that residents may have to make on when a storm approaches is whether they should evacuate their property and possessions for either a local shelter or out-of-town accommodations.

Depending on the severity of the storm, that decision can be made for those in low-lying areas: local authorities may order a mandatory evacuation.

In Biloxi, as many as six hurricane shelters can be activated in times of peril, but residents need to be aware of several factors if they are considering seeking refuge in a shelter.

The decision to open a shelter is usually based on the intensity of a storm and where it is expected to make landfall. Local Emergency Management leaders make the decision to open shelters in coordination with the American Red Cross, and the public is notified through

the media. In many cases, elementary schools are used for shelters, which are manned by Red Cross workers and public safety officers.

And the shelter sites can vary from year to year and storm to storm.

“The category of storms and the direction they are coming from are just a couple of the considerations when determining which shelters will be used,” Biloxi Emergency Management coordinator Linda Atterberry says. “Things like tides are also a consideration, so the locations of shelters and when they are activated are made on a case-by-case basis.”

If you think you may seek refuge in a shelter, some points to consider:

- Bring enough food and water for at least the first day. Bring your own blankets and other personal

needs. Cots cannot be guaranteed. No pets, firearms, alcohol or tobacco products are allowed.

- Public transit systems – buses and taxis – will stop operating when sustained winds reach 35 mph.
- If you have an infant, bring an adequate supply of diapers and formula.
- If you or a member of your family is on a special diet, bring the necessary food.
- If you are on prescription medication, try to have a two-week supply of medication.

If you’re thinking about evacuating, be familiar with evacuation routes. Traffic may be delayed by bridges opening to marine traffic. Bridges, by the way, will not open for marine traffic when sustained winds reach 35 mph.

It's illegal to sweep clippings into the street

Chances are, you’ve seen it done or even done it yourself: You cut your lawn, rake up the trimmings and pile them near the curb in front of your home. Or, you’ll sweep the trimmings into the street, where you hope they’ll be carried away by the wind.

These two scenarios result in one of the biggest causes of flooding in the city – **blocked storm drains**. These careless or unthinking actions negate the millions of dollars in improvements that the city is making citywide to drainage systems.

Piling leaves at the curb or sweeping trimmings into the street means that they will eventually find their way into the city’s storm drains. Either bag the leaves for pickup or

compost them. A stopped-up storm drain or ditch cannot carry run-off water as it is intended to do. When it rains, that water can flood streets, your property or your neighbor’s property.

It’s actually a violation of city ordinance to dump any material into storm drains, ditches, culverts, streams or waterways. (Sec. 9-1-15, Code of Ordinances, 1992). If you see anyone dumping debris into storm drains, ditches, culverts or streams, please contact the Public Works Department at 435-6271 or online at sullivan@biloxi.ms.us, or the Code Enforcement staff in the Community Development Department, 435-6270 or online at dking@biloxi.ms.us.

Major repairs to flood-zone homes may trigger code issues

Homeowners with damaged structures in a flood zone will be required to make sure their homes fully comply with flood regulations before the city can issue a building permit for repairs, according to FEMA regulations.

Community Development Director Jerry Creel said some property owners may find that their homes had been built before standards were in place to govern construction in flood zones.

"Those who are looking to repair heavily damaged homes in a flood zone should be aware of a few things," Creel said. "If the damage amounts to exceeds 50 percent of the fair market value of the home, it's considered 'substantially damaged' by FEMA. This means that in order for a building permit to be issued, the home must be brought into full compliance with the city's flood ordinance and FEMA regulations."

A number of homes, particularly older ones in east

Biloxi, were built decades ago, before flood-zone regulations existed.

"They were grandfathered in, but the grandfather clauses will not carry over into additions or new construction," Creel said. "One of the biggest issues that property owners will face is that regulations now call for structures in flood zones to be elevated to the new D-Firms base flood elevations, which could range from 12 to 17 feet above the mean sea level, depending on the location of the property."

The city does not allow property owners to re-build in a manner that violates floodplain management regulations, Creel said, nor can they replace previous violations that were damaged in the storm.

"Failure to comply with the codes will result in significantly higher flood insurance rates for everyone," Creel said, "and, frankly, insurance rates will end up

increasing for all property owners."

This year, Biloxi's flood insurance rating improved from a 7 to a 6.

Biloxi residents, even those covered under the windpool, are eligible for flood insurance discounts of up to 20 percent, thanks to the city's enforcement of flood-zone regulations and its continuing efforts to educate the public about how to minimize the threat of storms and flooding.

You can see an online map showing flood zones in Biloxi at biloxi.ms.us. You may also contact floodplain manager Rick Stickler at rstickler@biloxi.ms.us or at 435-6270.

The flood zone map is also available at the Community Development Department on Dr. Martin Luther King Jr. Boulevard or at the Woolmarket Fire Station on Woolmarket Road.

Be sure to get a building permit before construction

When you or a licensed contractor make repairs or alterations to your property, those repairs should be in compliance with established building codes. This ensures that work is up to code and will be able to withstand most weather conditions.

To make sure that your plans are within code, a building permit must be obtained from the City of Biloxi Building Division before you build, alter, regrade or fill on your property.

New buildings in the floodplain must be protected from flood damage. Biloxi's building code requires that new buildings must be elevated to the new D-Firms base flood elevation. (See the enclosed map for a view of the 100-year floodplain.)

The code also requires all additions and "substantial" improvements or repairs from damage to a building be treated as new construction. A substantial improvement or repair is one in which the value of an addition, alteration, repair or reconstruction project exceeds 50 percent of the total value of the existing building.

Before you begin a project, contact the Building Division at 435-6270 or online at building@biloxi.ms.us. Qualified staff can help make sure that your project complies with building codes. Biloxi is currently under the 2008 IBC and the 2005 National Electrical Code.

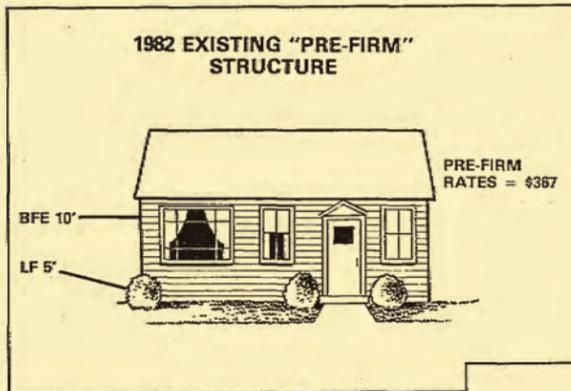

Contractors must have city license

Property owners are warned to beware of transient contractors who typically set up shop in the wake of disasters such as Hurricane Katrina.

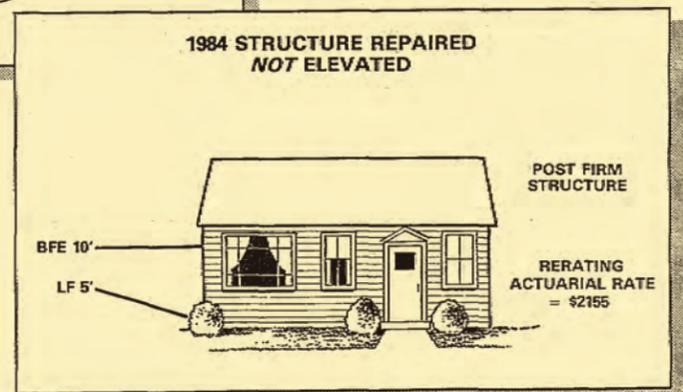

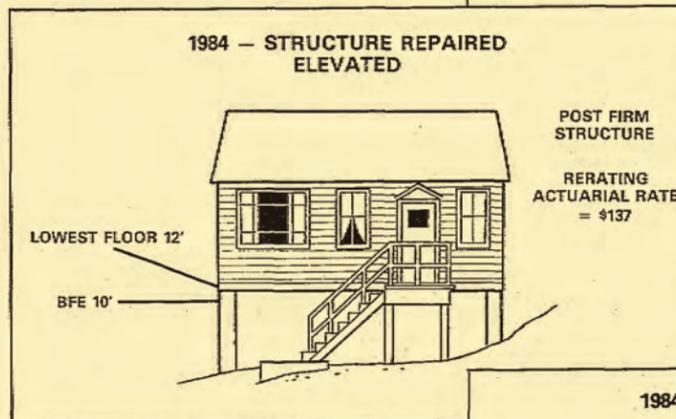

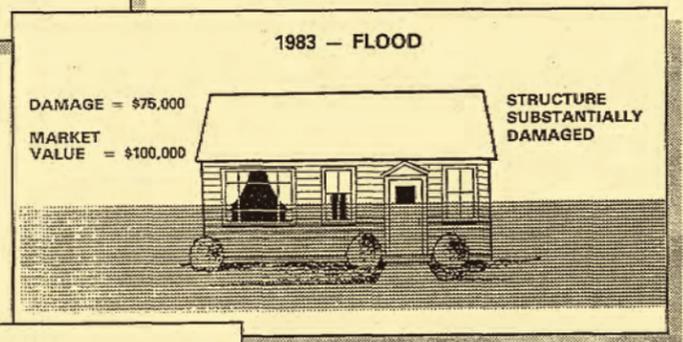

Ask to see the person's City of Biloxi license card, which is required to do business in this city. Do not pay any money in advance. Do not sign any contracts. And do not pay any money until the work has been inspected and approved by a city inspector.

If you have any questions or concerns, call the Community Development Department at 435-6280.

How elevations impact your insurance rates

This 1980s FEMA graphic, which was originally distributed to Biloxi residents in December, 2005 illustrates the implications that homeowners face when making repairs to homes that pre-date the Flood Insurance Rate Map. In short, if your substantially damaged home is in a flood-prone area of the city and if your repairs did not include bringing the structure into compliance with current flood elevations, you face significant increases in the cost of your flood insurance. You can see the flood-prone areas of the city in the map on Pages 6 and 7 of this mailout. A larger version can be viewed online at biloxi.ms.us or at any city facility.

You can take steps now to protect your property against flooding

There are some steps that you can take now to prepare your property against flooding.

One option may be "retrofitting," which is altering your home to eliminate or reduce flood damage.

A few things to consider:

- Elevate your building so that flood waters do not enter or reach any susceptible portions.
- Construct barriers out of fill or concrete between your building and flood waters.
- "Dry flood proof" your non-residential building, which entails making walls and flooring watertight so water cannot enter.
- "Wet flood proof" your non-residential building, which entails modifying the structure and relocating

contents to lessen the damage caused by any flood waters that enter your structure.

- Sandbagging is a short-term measure that can also be helpful.

The City of Biloxi is home to many reputable, licensed building contractors who are qualified to make repairs for you. However, after each storm, a number of transient contractors sets up temporary shop in our community. **Before signing any contract or paying any money for repair work, you should ask to see the person's City of Biloxi license.**

If you have any doubts or questions, contact the Building Division at 435-6270 or online at building@biloxi.ms.us to ensure that this individual is licensed to operate in the City of Biloxi.

Need More Info?

- To read FEMA's answers to frequently asked questions about repairing significantly damaged properties in flood zones, visit biloxi.ms.us.
- To read FEMA's "Homebuilder's Guide to Coastal Construction," which provides technical guidance and recommendations concerning the construction of coastal residential, visit biloxi.ms.us.
- Those with other questions can call the Community Development Department at 435-6280 or e-mail building@biloxi.ms.us.

Coast Transit urges needy to register now for emergency evacuation transportation

Coast Transit Authority is reminding residents in need of emergency storm-evacuation transportation to sign up now.

"We strongly advise that if at all possible you make your own emergency evacuation plans and evacuate the area when instructed to do so by the county EMA," said CTA Director Kevin Coggin. "It is always best to have your own plans in place, but we are available to provide assistance to the citizens of Harrison County if they need it."

CTA is managing the evacuation transportation program for Harrison County and will be providing transportation assistance for out-of-town evacuations, to local shelters of last resort, and shelters for pets and their owners.

Residents are advised to sign up now if there is a chance

they will need evacuation transportation. You should register with Coast Transit Authority immediately to make sure you are on the list to receive assistance.

The number to call is 896-8080.

Spanish speaking operators are available. CTA also needs to know as soon as possible of any special medical or other needs to those being transported.

Transportation to a pet shelter will be provided for dogs, cats, and birds only. The pets must be in carriers that can be lifted and loaded by the pet owner. There will be no assistance for loading and unloading pets.

The Harrison County Emergency Management Agency and the Humane Society of South Mississippi are providing

a pet shelter, but the pet owners must accompany the pet during transportation and stay at the same shelter with their pets.

Only two carry-on items per person will be allowed on the buses, either two bags or one bag and one pet carrier. There will be no exceptions.

"It is critical that you go ahead now and make preparations to leave if an evacuation is called," Coggin said. "You should prepare the items you must have to leave in orderly fashion so that you can leave quickly and you should have pet carriers in hand ready to use if you intend to take a pet. And, you should register immediately if you think you could require our assistance."

You can get free how-to info on preparation and construction

Need more information about flood preparation and construction? The city has assembled a wealth of free how-to booklets about steps that you can take to minimize damage from storms and flooding.

The books are available at these locations:

- Community Development Department, Dr. Martin Luther King Jr. Municipal Building, 435-6280.
- City Hall lobby, Lameuse Street.
- Donal Snyder Sr. Community Center, Pass Road
- Biloxi public libraries (Lameuse Street, Popp's Ferry Road, Division Street and Pass Road).
- Woolmarket Fire Station, 8479 Woolmarket Road

You can also contact the City's Building or Code Enforcement divisions online at biloxi.ms.us/communitydevelopment.

For detailed info on building permits and construction requirements, contact the Building and Code Enforcement divisions at the Community Development Department, 435-6270 or online at building@biloxi.ms.us. Those planning work in a flood-prone area should contact floodplain manager Rick Stickler at rstickler@biloxi.ms.us or at 435-6270.

You can obtain a number of helpful emergency preparedness brochures online at FEMA's website (www.fema.gov) or from the National Hurricane Center (www.noaa.nhc.gov).

Storm, disaster info can be kid stuff, thanks to website

It's never too soon to begin the education process about storms and the damage they can cause, and a host of educational activities especially for children are now available online.

The Flood and Storm section of Biloxi's web site (<http://biloxi.ms.us>) includes a direct link to

FEMA for Kids, which features Herman, "the spokescrab" and kid-style information on how to be prepared for disasters and how you can prevent disaster damage.

Parents and teachers will find a number of family or classroom activities for groups.

To see the FEMA for Kids site, visit <http://biloxi.ms.us/floodstorm> and click on For Kids at the top right.

Mayor A.J. Holloway taped an introduction for "A Lady Called Camille" at the site of the Camille memorial, with the Episcopal Church of the Redeemer in the background, Aug. 3, 2005. The program aired Aug. 17, 2005, a mere 12 days before Katrina destroyed the church and bell tower, and leveled the Camille memorial, shown in the background at left.

City to resurrect Camille special to mark 40th anniversary of storm

The City of Biloxi, which had worked with Cable One to annually cablecast the documentary "A Lady Called Camille" in the years before Katrina, is resurrecting the special this year, the 40th anniversary of the storm.

The city and Cable One will air "A Lady Called Camille" three times on Monday, Aug. 17, and the annual cablecast of "Katrina & Biloxi" will be on Saturday, Aug. 29. Both programs, which will be shown on Cable 13, will air at 8:30 a.m., 8:30 p.m. and 10:30 p.m. on the respective anniversaries.

Besides marking the anniversaries of the killer storms, the airings are designed to help educate new residents and remind longtime residents about the dangers of storms and flooding.

"We had retired 'A Lady Called Camille' when we produced 'Katrina & Biloxi,'" Holloway said, "but we decided to bring 'Camille' back with this being the 40th anniversary. This year, we'll be giving people double dose of reality. We want them to watch and remember, and take action to prepare their families and their property."

"A Lady Called Camille" will feature a two-minute introduction by Mayor A.J. Holloway that was taped at the site of the Hurricane Camille memorial on the grounds of the Episcopal Church of the Redeemer, which was destroyed days after the program aired.

"A Lady Called Camille," which was created by the National Office of Civil Defense, tells the story of the Category 5 storm that made landfall on the Mississippi Gulf Coast on the night of Aug. 17, 1969. Camille, with winds in excess of 200 mph and a 25-foot storm surge, swept across the Coast on the night of Aug. 17, 1969.

The storm, which at the time was the most severe to strike the U.S., caused billions of dollars in damage, with 134 deaths and 23 persons missing from the Gulf Coast area. A nationwide relief effort, which included scores of military and civilian volunteers and businesses, helped Biloxi and surrounding communities in the aftermath of the storm. President Richard M. Nixon also visited the Coast in the days after the storm. The documentary shows preparation and recovery efforts that were organized largely by the legendary Wade Guice, former Harrison County Civil Defense Director whose wife, Julia, served as Biloxi Civil Defense Director at the time. The duo are seen at their posts at the outset of the film.

"Katrina & Biloxi" is a 50-minute documentary that tells the story of Biloxi's encounter with Hurricane Katrina. The award-winning documentary uses video from before, during and after the storm and interviews with Biloxi leaders, residents and volunteers to tell the story of Biloxi's encounter with Katrina.

The documentary is packaged with a photo album that is being sold for \$20 at all Biloxi municipal facilities and public libraries throughout Harrison County. It's also available online at biloxi.ms.us.

Federal agencies encouraging residents to use direct deposit

In those critical days after Hurricane Katrina, the U.S. Treasury Department worked with the Social Security Administration to get displaced Social Security and other federal benefit checks to recipients, as quickly as possible. But those who already were using direct deposit had immediate access to their funds from virtually anywhere, thanks to ATMs and financial institution networks.

That's why the Treasury and the Federal Reserve Banks – through **Go Direct** – are urging Social Security check

recipients who live along the Gulf Coast to switch to direct deposit. The recommendation, offered in light of devastating hurricanes, is aimed at ensuring citizens receive their federal benefits without disruption.

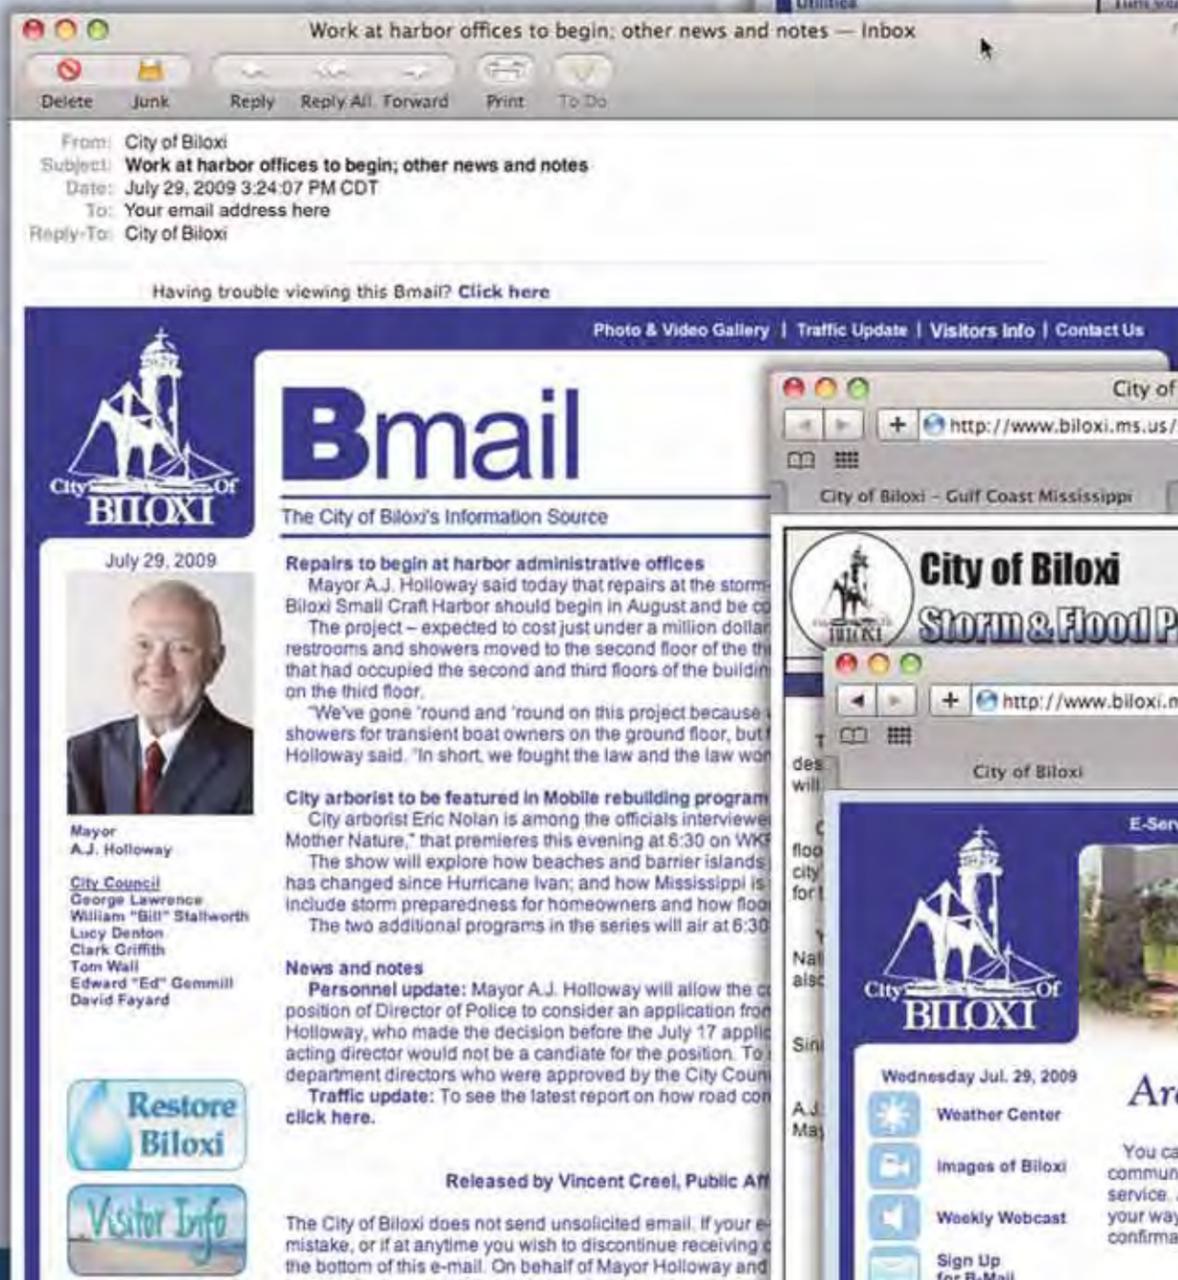

Go Direct makes it easy to sign up for direct deposit. People can sign up by calling the toll-free **Go Direct** helpline at (800) 333-1795 or by visiting www.GoDirect.org to sign up online. To learn more about **Go Direct**, visit www.GoDirect.org.

We deliver.

Anybody can have a site on the World Wide Web, but there's only one that delivers news exclusively about the City of Biloxi directly to you. It's biloxi.ms.us.

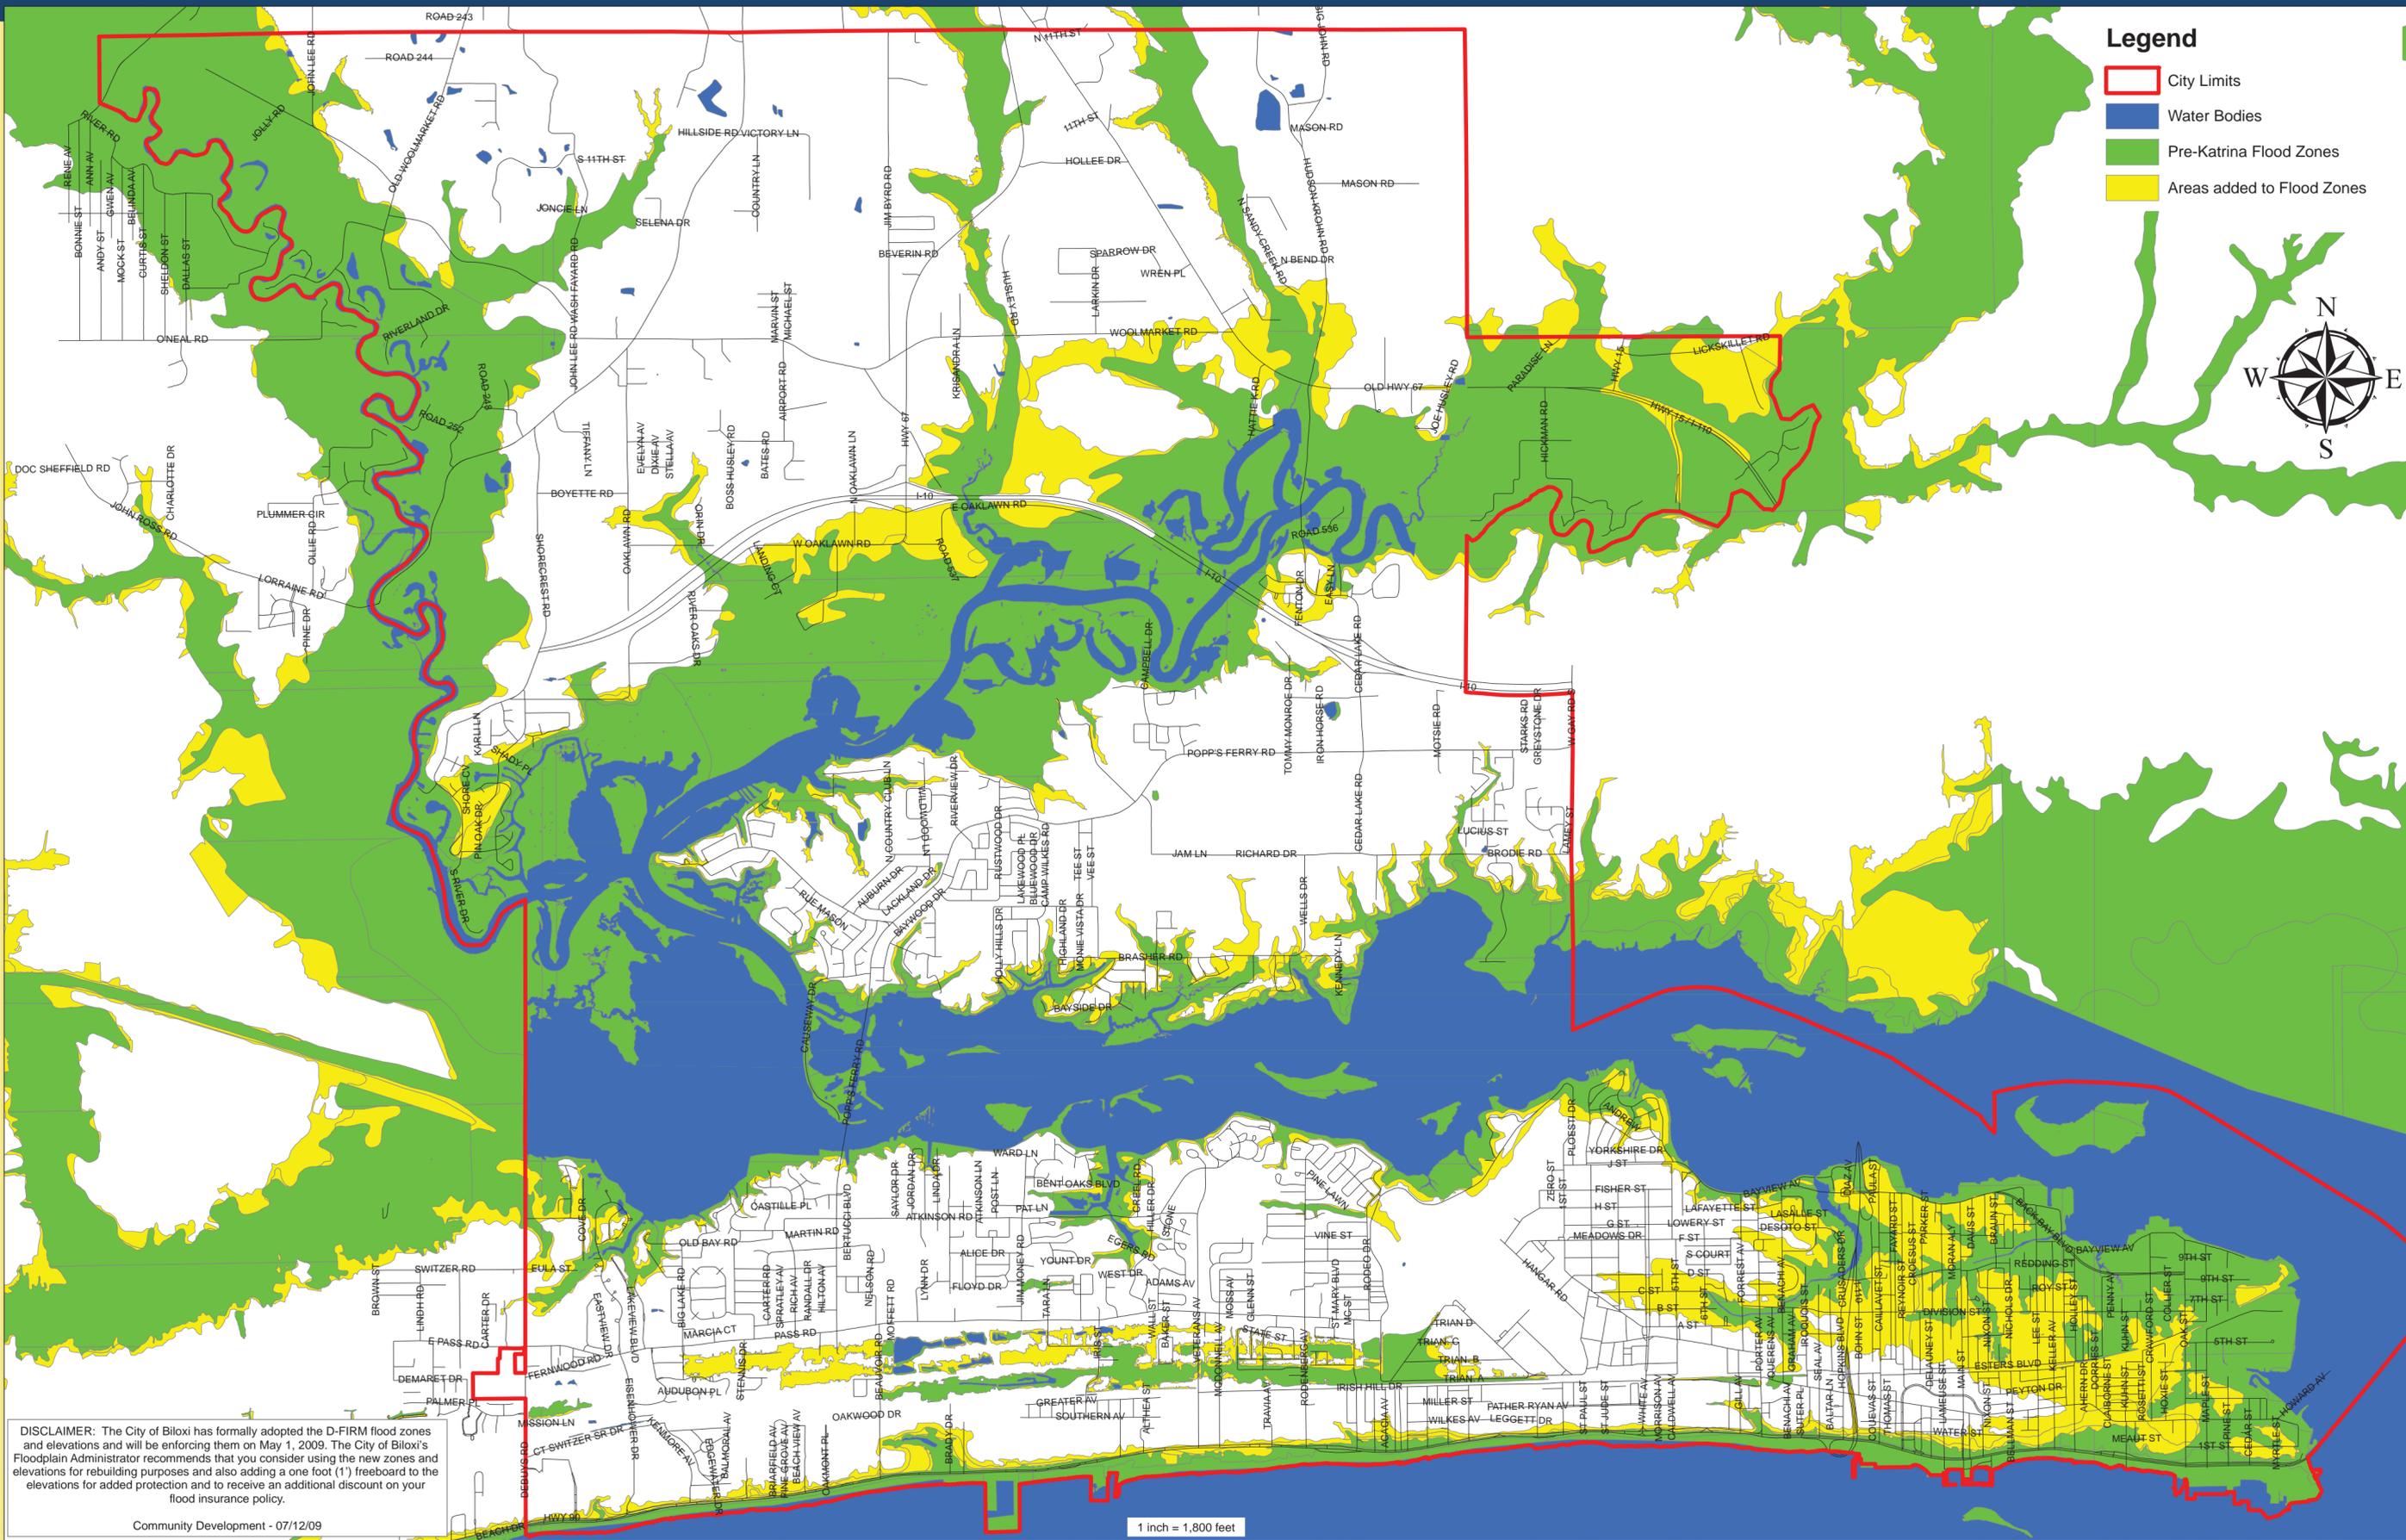

Don't wait until a storm threatens to get vital information about your community. Get it now. Delivered directly to you and for free. In the four years since Katrina, the city has e-mailed more than 2 1/2 million storm-recovery updates to Biloxians and an audience around the globe. Information on a host of local issues and projects, as well as details about special meetings and events of community interest. These e-mails and the city website are your No. 1 source of information on all things Biloxi.

Visit the city's web site at biloxi.ms.us and click on Bmail on the left side of the screen. It takes only a few seconds to sign up, and you'll be in the loop – and in the know.

The Old and New Flood Zones

DISCLAIMER: The City of Biloxi has formally adopted the D-FIRM flood zones and elevations and will be enforcing them on May 1, 2009. The City of Biloxi's Floodplain Administrator recommends that you consider using the new zones and elevations for rebuilding purposes and also adding a one foot (1') freeboard to the elevations for added protection and to receive an additional discount on your flood insurance policy.

A few words about this map

Much has been made and said about the federal government's new flood elevations, which went into effect in Biloxi in May 2009.

While much of the focus has been on the height of construction, this maps shows the significant increase in the size of the flood zone.

For instance, nearly all of Point Cadet, the eastern tip of the Biloxi peninsula, is now in a flood zone, as is Eagle Point in north Biloxi.

The yellow areas show the flood zone before the revisions; the yellow areas and the green areas comprise the new flood zone. The blue areas are water bodies.

Completed elevation certificates are available from the city's Community Development Department.

Cảnh báo sớm về bão năm nay

Năm 2005 Biloxi đã chuẩn bị đối phó bão lụt kỹ hơn bao giờ hết trong lịch sử của thành phố, nhưng chính thành phố bị bão tàn phá này lại phải đương đầu với một loạt vấn đề mới trong mùa bão này mà chính xác là cư dân nhất thiết phải có kế hoạch đối phó bão của từng cá nhân và chuẩn bị sẵn các trang bị dự phòng bão.

Thị trưởng A.J. Holloway nói rằng đối với hơn 2,000 cư dân hiện đang sinh sống tạm thời trong trailers và lều trại và hàng ngàn tình nguyện viên thành phố, nắm được nguồn thông tin về bão lụt kịp thời sẽ vô cùng cần thiết trong mùa bão này. Ngoài ra, Holloway nói: “Cư dân nên dự đoán có những đề nghị sớm hơn thường lệ về việc di tản khỏi các khu vực đất thấp.”

“Chúng tôi đã nhắc đi nhắc lại với giới truyền thông quốc gia rằng cơn bão Katrina không phải là cuộc thử sức đầu tiên của chúng ta, mà chúng ta hy vọng nó sẽ chỉ là cuộc thử sức lớn nhất mà chúng ta từng thấy.” Holloway vừa qua đã nói với một nhóm gồm hơn hai chục lãnh đạo các ban ngành chủ chốt của thành phố và các trưởng phòng cấp trung trong các cuộc họp chuẩn bị đối phó bão. “Tất cả chúng ta đều biết nó sẽ chưa phải là cuộc thử sức cuối cùng. Tôi tự hào về toàn bộ công việc mà quý vị và toàn thể cư dân Biloxi đã làm và sẽ tiếp tục làm. Giờ đây, tôi đề nghị tất cả mọi người chuẩn bị lại.”

Năm nay, điều quan trọng nhất là, Holloway nói, phải thông báo việc di tản kịp thời cho công chúng biết.

“Nếu chúng ta ở trong vùng dự báo có bão”, ông nói, “người dân phải dự đoán sẽ có một thông báo di tản trong vòng 72 giờ, một cuộc di tản bắt buộc đối với Vùng A và các vùng thấp trong vòng 48 giờ, và một cuộc di tản bắt buộc đối với Vùng B trong vòng 36 giờ.”

Khi có lệnh di tản, cư dân sinh sống tạm thời trong các trailers không được đưa xe trên đường. Holloway nói: “Do không sử dụng cầu Biloxi-Ocean Springs trong mùa bão năm nay, chúng ta bị giới hạn ở một số tuyến đường di tản, và chúng ta không muốn bị những trailers này gây tắc nghẽn giao thông. Các trailers này phải ở đúng vị trí quy định.”

Biloxi sẽ mở đến năm trung tâm tạm cư, nhưng số lượng và địa điểm của các trung tâm này sẽ tùy thuộc vào chiều hướng và cường độ của cơn bão. Phương tiện vận chuyển công cộng sẽ được thông báo cho những người không có phương tiện để đi đến các trung tâm tạm cư ngoài thành phố. Ngoài ra, phải thông báo kế hoạch sử dụng đường tạm xe lưu thông hai chiều ở các trục đường chính sớm hơn thường lệ.

“Người dân không cần phải nhắc đến lần thứ hai mới di tản” Holloway tuyên bố, “nhưng chủ yếu là lệnh di tản phải phát sớm hơn, xét vì chúng ta phải đối phó nhiều yếu tố.”

Holloway và Giám đốc Quản lý David Staehling nói rằng thành phố đã chuẩn bị rất kỹ hơn bao giờ hết lúc Katrina ập vào ngày 29 tháng 8, 2005.

“Trước khi bão vào chúng tôi đã ký hợp đồng tạm thời dọn dẹp vật liệu đổ nát trước bão, về mặt này chúng ta đã giải quyết xong, và, dĩ nhiên, chúng ta cũng được hưởng chế độ bảo hiểm gián đoạn kinh doanh 10 triệu đô la” Staehling nói. “Năm nay chúng ta phải cẩn thận sắp xếp ổn thỏa lại các việc này, mặc dù chúng ta có thể gặp khó khăn trong việc xin thêm \$92,000 đô la cho bảo hiểm gián đoạn kinh doanh cho năm nay.”

Trong các cuộc họp chuẩn bị đối phó bão của thành phố mới đây, nhân viên thành phố đã xem xét kế hoạch để sắp xếp các loại xe cấp cứu và các thiết bị nặng vào các khu vực an toàn hơn, bố trí nhiên liệu và các nhu yếu phẩm khác cho sau bão, cập nhật thông tin liên lạc cho các nhân viên chủ chốt. Việc chỉ sử dụng hai trong số ba cây cầu hiện có trên bán đảo Biloxi cho tuyến đường di tản cũng được thảo luận.

Advertencias a venir anterior esta estación

Biloxi fue preparado mejor para las tormentas y el flooding en 2005 que en cualquier otra hora en la historia de la ciudad, pero la ciudad tormenta-devastada hace frente a un anfitrión de nuevas ediciones esta estación del huracán, que los medios él son vital importantes para que los residentes tengan sus kits personales del plan y del huracán de la tormenta en lugar.

Alcalde A.J. Holloway dice que con más de 2.000 acoplados y campistas temporalmente contener residentes y a millares de voluntarios en ciudad, teniendo un flujo oportuno de la información de la tormenta y de la inundación será vital esta estación del huracán. Además, Holloway dicho, residentes debe esperar ver recomendaciones temprano-que-generalmente con respecto a las evacuaciones de areas de bajo-mentira.

“Dijimos a medios nacionales en varias ocasiones que Katrina no fuera nuestro primer rodeo, pero esperábamos que sería el más grande que veríamos siempre,” Holloway dijo recientemente a grupo de dos jefes de docena servicios dominantes de la ciudad y de encargados mid-level en uno de una serie de reuniones de la preparación de la tormenta. “Todos sabemos que no será nuestro dura, aunque. Soy orgulloso de todo el trabajo que usted y todos los residentes de Biloxi han hecho y continúan para hacer. Ahora, le estoy diciendo conseguir listo otra vez.”

“La cosa más importante esta estación, Holloway dicho, proporcionará lainformación oportuna de la evacuación al público.

“Si estamos en el cono de la probabilidad,” él dijo, “gente debe esperar ver un aviso recomendado de la evacuación 72 horas hacia fuera, una evacuación obligatoria para la zona A y las áreas de bajo-mentira 48 horas hacia fuera, y una evacuación obligatoria para la zona B 36 horas hacia fuera.”

Si se da una orden de la evacuación, no se permitirá ningunos acoplados temporales en los caminos. Holloway Dicho: “con el Biloxi-Oceano suelta el puente hacia fuera para esta estación del huracán, somos limitados en el número de las rutas de la evacuación, y no deseamos estos acoplados que soportan tráfico. Seguirán siendo donde están.”

El tanto como cinco abrigos podrían abrirse en Biloxi, solamente número y localización de esos abrigos dependerían de la trayectoria y de la fuerza proyectadas de la tormenta. El transporte público sería anunciado para ésos sin los medios del recorrido a los abrigos de la hacia fuera-de-ciudad. Además, cualquier plan del contraflow

para el tráfico en los caminos importantes sería anterior anunciado que generalmente.

“La gente no tendrá que ser dicha dos veces para evacuar,” Holloway declarado.

“Solamente él es vital que sale la palabra anterior, en vista de los muchos factores que hacemos frente.” Holloway y el director de la administración David Staehling dijeron que la ciudad fue preparada mejor que en cualquier otro momento en que Katrina pulsó de agosto el 29, 2005.

“Teníamos nuestro contrato temporal del retiro de la ruina en lugar antes de la tormenta, golpeamos el funcionamiento de tierra en eso frente, y, por supuesto, teníamos la póliza de seguro de la negocio-interrupcio'n \$10 millones en efecto, también,” Staehling dicho. “Miramos para tener todas esas cosas en lugar otra vez este año, aunque podemos tener dificultad el conseguir la política de la interrupción del negocio para otros \$92.000 de este año.”

Durante la serie reciente de la ciudad de reuniones de la preparación de la tormenta, los planes repasados personal de la ciudad para los vehículos de la emergencia del estacionamiento y el equipo pesado en áreas más seguras, arreglando para el combustible de la poste-tormenta y otras fuentes, y poniendo al día la información del contacto para los personales claves. Las rutas de la evacuación que usaban solamente dos de tres puentes disponibles en la península de Biloxi también fueron discutidas.

Lo que todo residente tienen que saber:

Habra constante informacion sobre: trayectoria de la tormenta, posible inundaciones, rutas de tomar.

Rutas de evacuacion recomendada: 72 horas que las tormenta esta en el modo de probabilidad.

(Para ver rutas de evacuacion y zonas, ver el mapa en las pagina 2.)

Etc: Informacion via city e-news y llamando por telefono el City of Biloxi Storm Info Line, para un mensaje grabado 435-6300.

The color of construction

City simplifies permits, adds splash of color to better identify work

Identifying the types of construction going on in Biloxi is simpler these days – for contractors, property owners and city inspectors, as well as citizens interested in construction in their neighborhoods. Tracking construction is a particularly vital concern in flood zones.

The city's Community Development Department is now using color-coded permits that clearly illustrate the type of permit granted for construction work, and the new system has reduced what once may have required a contractor to obtain five separate permits to having everything all on one permit.

It's all part of the city's continuing efforts to help streamline and simplify the process, and to amplify that different types of work may be required to meet stricter standards.

For instance, work in an area susceptible to flooding, known as a special flood hazard area, must comply with FEMA regulations and the city's Flood Damage Prevention Ordinance. Those planning any work in a flood-prone area should contact floodplain manager Rick Stickler at rstickler@biloxi.ms.us or at 435-6280.

Previously, permits were a standard beige color, and contractors may have been required to obtain separate permits for building, electrical, plumbing, gas and mechanical (heating, ventilation and air conditioning).

“Now,” says Jerry Creel, the city's Community Development director, “when someone passes by a project, they won't be seeing a collection of non-descript permits. Instead, they'll see that color-coded permit, and they'll know that if it's blue, then the project is in a flood zone, which means that things like elevation will be more serious than on the typical construction job. These color-coded permits are designed to help call attention to those issues.”

The colors:

- Lime green permit is the basic permit for work where there are no special conditions or enhanced requirements.
- Blue permit is for properties or structures located in a special flood hazard area.
- Beige signifies the “Architectural/Historical Review District,” which means that the proposed project has been reviewed and approved by the Architectural and Historical Review Committee.
- Red is a Demolition Permit.
- Orange is for “Moving” a structure.
- Purple is for “grading” or “filling” a site.
